SPECIFICATION OF THE PARTS

1. For the Socket 29 mm

Model number---Beta

Type of socket----Hexagonal Type

Material type---Metal

Socket length-----40.5 mm

Drive size----3/4

Points----6 side

2. O- Ring

Model-----Seal

Part Name it is used for-----30700054

Size (Cross section and inside diameter) and tolerance-----25mm-150mm

Material type and hardness-----Plastic Type and O-ring seal

Temperature range-----40 °C

3. Adjustable wrench

Model----Beta

Material-----Metal

Handle (Length and width) -----Length -----400mm Width---40mm

Jaw Capacity----110.2 lbf

Extra feature (Optional)-----Adjustable Type

4. Grease Gun

Product dimension-----Steel material 340

Power source-----Manual PSI-----355.58

Extension-----Three type with flexible

5. Filter

Type of filter

1. Element oil lub filter

Manufacturer part number-----10004836AB

Filter medium material-----Aluminium

Quantity needed- 60 (This is additional information)

2. Primary Fuel filter

. Manufacturer part number-----10004801AA

Filter medium material-----Aluminum

Quantity needed- 40(This is additional information)

3. Secondary Fuel Filter

. Manufacturer part number-----10004802AB

Filter medium material-----Aluminum

Quantity needed- 40(This is additional information)

6. Inner tube (front)

Manufacturer-----

Material-----Plastic

Features-----Tube

7. Inner tube (rear)

Manufacturer---

Material-----Plastic

Features-----Tube

8. Mounted disc plough

Axle type-----**(Semi-Float)**

Draw bar type-----**Circle type**

No. of disc---**5(five)**

Type of disc---**Cast type (sonalika)**

Disc diameter—**420mm**

Tillage width-----**150mm**

NB- We did not get the parts catalogue here in Mekelle to list out the specifications for the needed material especially for the mounted Disc plough. Please contact Tekhaf Trading at Addiss Abeba for better information.
